

MV-LDFM-H

High Brightness Dot-Type Lighting

MV-LDFM-H High Brightness Dot-Type Lighting, through the high brightness LED lamp beads and special optical lens structure design, to achieve high illumination, high concentration of light, high uniformity of the circular direct light effect. Small and compact dimensions, suitable for the installation of limited size, high brightness requirements of the lighting scene.

Key Features

- Round direct light source, uniform illumination in the center illuminated area.
- High-brightness spotlight design, surface illuminance (center) >2 million Lux.
- Compact size to fit in very narrow installation spaces.

Applicable Industry

Contour/dimension measurement, surface defect detection, etc.

Available Model

- MV-LDFM-H-20-10-W: White
- MV-LDFM-H-20-5-IR850: IR850

Naming Rule

MV - LDFM - H - 20 - 10 - W

LDFM: High Brightness dot-type lighting

H: Hik style series

20: Optical outlet diameter

10: Power consumption

W: Color

Specification

Parameter Model	Performance			Mechanical			Electrical feature		
	Color	Center illuminance	Best working distance	Dimension	Optical outlet diameter	Weight	Power consumption	Input current	Connector type
MV-LTDS-H-100-W	White	> 400Klux@WD=100 mm	50 ~ 500 mm	75.3 mm × Ø40 mm	Ø18.5 mm	0.1 kg	9 W	3 A	12M-5A
MV-LTDS-H-200-W	Infrared	> 150mW/cm2@WD=100 mm	50 ~ 500 mm	75.3 mm × Ø40 mm	Ø18.5 mm	0.1 kg	5 W	1.5 A	12M-5A

Other Parameter

Model	MV-LDFM-H
Parameter	High Brightness Dot-Type Lighting
Performance	
Drive mode	Constant current
Wavelength	IR: 850 nm
Color temperature	W: 6000 ~ 7000K
Mechanical	
Cable length	1 m
Cooling mode	Natural cooling
Temperature	Working temperature: 0 ~ 40°C Storage temperature: -20 ~ 80°C
Humidity	5% to 90ziramn %RH, non-condensing
